DETAILED ACTION

Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor suggests with respect to the entire claim (f), forming a plurality of holes in said second and third insulating films; and (h) after said step (g), forming a third wiring over said third insulating film such that said third wiring is connected to said first and second wirings via said holes, wherein before said step (h), said first wiring is in a floating state and said second wiring is connected to said semiconductor substrate, wherein a silicon content of said second insulating film is higher than that of said third insulating film, wherein said step (c) comprises the steps of: (c1) forming a first titanium nitride film over said first insulating film; (c2) forming an aluminum film or aluminum alloy film over said first titanium nitride film; (c3) forming a second titanium nitride film over said aluminum or aluminum alloy film; and (c4) patterning said first titanium nitride film, said aluminum or aluminum alloy film and said second titanium nitride film, and wherein, in said step (d), said second insulating film is connected to said aluminum film or aluminum alloy film of said first and second wirings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oshima et al. (US 2002/0100984) disclose a multilevel wiring structure, however it fails to disclose the same method of forming a multilevel wiring structure as the current application.
